

Agenda item 2.5 (b)

Paragraph 14 of the annotated agenda

Outcomes of MP77

CDM EB 101

Katowice, Poland, 26 to 29 November 2018

Summary of the outcome: MP 77

The MP held its 77th meeting from 2 to 5 Oct in Bonn

The outcomes to be considered by the Board are:

Methodological standards/issues	Recommendation	Para no. of annotations
1 Standard	Approve	22
1 New TOOL	Approve	24
6 Revised methodologies	Approve	25a,b,c,d; 31a,b
2 revised TOOLS	Approve	25e, 31c
1 revision request	Reject	26
3 Seek mandate	Provide mandate	27, 28, 33
3 Clarifications	Approve	29, 34a,b
1 New methodology	Approve	30
2 Methodologies	No change	32

Summary of the outcome: MP 77

List of cases recommended by the MP Chair for presentation in detail:

1. Para 22: Approve the new standard “Establishment of sector-specific standardized baselines”;
2. Para 24: Approve the new tool “TOOLXX: Positive list of technologies”;
3. Para 25a: Approve the revision of “AM0082: Use of charcoal from planted renewable biomass in the iron ore reduction process through the establishment of a new iron ore reduction system”;
4. Para 25d: Approve the revision of “ACM0019: N₂O abatement from nitric acid production”;
5. Para 25e: Approve the revision of “TOOL27: Investment analysis”;
6. Para 27: Provide a mandate to revise “ACM0003: Partial substitution of fossil fuels in cement or quicklime manufacture” and relevant small-scale methodologies.

Summary of the outcome: MP 77

List of cases recommended by the MP Chair for presentation in detail:

7. Para 28: Provide a mandate to revise “AM0031: Bus rapid transit projects”;
8. Para 30: Approve the new methodology “AMS-III.XX: Efficient operation of public transport”;
9. Para 31c: Approve the revision of “TOOL19: Demonstration of additionality of microscale project activities”;
10. Para 33: Provide a mandate for a new methodology on agriculture.

Recommendations to the Board

Recommendations:

- Take note of this presentation;
- Take note of the meeting report of the 77th MP meeting

Board members are reminded to indicate to the secretariat by the end of today any additional cases they would like to have presented.

Thank you

Agenda item 2.5 (b)

Paragraph 14 of the annotated agenda

Key cases (1)

Meth no	Title	Key issues
-	Standard: Establishment of sector specific standardized baselines	The document was formally a 'guideline' and addresses the guidance provided by EB100.
TOOLXX	Positive list of technologies	New tool to address periodic assessment and update of the positive lists contained in several methodologies.

Key cases (2)

Meth no	Title	Key issues
AM0082	Use of charcoal from planted renewable biomass in the iron ore reduction process through the establishment of a new iron ore reduction system	The revision of AM0082 is to incorporate reference to "TOOL16: Project and leakage emissions from biomass".
AM0091	Energy-efficiency technologies and fuel switching in new and existing buildings	To revise the methodology to refer to the new tool "TOOL31: Determination of standardized baselines for energy efficiency measures in residential, commercial and institutional buildings".

Key cases (3)

Meth no	Title	Key issues
ACM0006	Electricity and heat generation from biomass	Revision to include non-binding best practice examples.
ACM0019	N2O abatement from nitric acid production	Revision to include non-binding best practice examples and to amend baseline parameters and monitored parameters.
TOOL27	Investment analysis	This is the annual update of the tool to revise the cost of equity figures in the appendix to the tool.

Key cases (4)

Meth no	Title	Key issues
AM_REV_0258	Regards ACM0008: Abatement of methane from coal mines (Version 8.0)	The proponent would like to revise the applicability of ACM0008 that allows for the extraction of methane from a virgin coal bed BEFORE the mining activity starts.
ACM0003	Partial substitution of fossil fuels in cement or quicklime manufacture	The MP seeks a mandate to revise ACM0003 and other relevant small scale methodologies to introduce reference to "TOOL16: Project and leakage emissions from biomass".
AM0031	Bus rapid transit projects	The MP seeks a mandate to revise AM0031 as the methodology does not cover situations where there are changes to the number of vehicles retired as a result of the increase in the population and consequent increase in the demand for buses.
AM_CLA_0279	Regards ACM0008: Abatement of methane from coal mines (Version 8.0)	Clarification request whether ACM0008 allows for the extraction of methane from a virgin coal bed BEFORE the mining activity starts.

Key cases (5)

Meth no	Title	Key issues
AMS-III.XX	Efficient operation of public transportation	The MP has worked on the EB 100 request to address potential uncertainties with regard to the baseline estimation. The methodology covers measures such as improved transit logistics and smart traffic systems.t
AMS-II.E	Energy efficiency and fuel switching measures for buildings	To revise the methodology to refer to the new tool “TOOL31: Determination of standardized baselines for energy efficiency measures in residential, commercial and institutional buildings”.
AMS-III.AE	Energy efficiency and renewable energy measures in new residential buildings	To revise the methodology to refer to the new tool “TOOL31: Determination of standardized baselines for energy efficiency measures in residential, commercial and institutional buildings”.
TOOL19	Demonstration of additionality of microscale project activities	Positive lists have been introduced replacing the unit size thresholds. The cover note contains an analysis on the applicability to SMEs.

Key cases (6)

Meth no	Title	Key issues
AM-II.Q	Energy efficiency and/or energy supply projects in commercial buildings	This revision was to introduce reference to "TOOL31: Determination of standardized baselines for energy efficiency measures in residential, commercial and institutional buildings". However, the MP has found that the methodology is not compatible with the tool.
-	Mandate for new methodology	The MP has been working on a revision to "AMS-III.BK: Strategic feed supplementation in smallholder dairy sector to increase productivity" for several meetings and has come to the conclusion that a new methodology rather than a revision of AMS-III.BK would be more appropriate.

Key cases (6)

Meth no	Title	Key issues
SSC_742	Clarification on the units used in the fNRB calculation under TOOL30	The enquirer is a project participant who sought clarification on the following two issues: a) (Issue 1) Whether a questionnaire survey can be used to monitor utilization hours under Option 1 of AMS-II.G; b) (Issue 2) Whether cubic meters instead of tonnes can be used in the calculation of fraction of non-renewable biomass under TOOL30.
SSC_743	Validity of the results of the annually made monitoring surveys like Kitchen Performance Test (KPT)	The proponent sought clarification on several monitoring aspects of "AMS-II.G: Energy efficiency measures in thermal applications of non-renewable biomass" (ver.5).
