

Agenda item 4.1(b)(ii)

Paragraph 28 of the annotated agenda

Mandate to revise “AM0031: Bus rapid transit projects”

CDM EB 101

Katowice, Poland, 26 to 29 November 2018

Background

- MP 77 considered a post-registration change request of a project applying AM0031 version 6.0.

Key issues and proposed solution

- AM0031, paragraph 31: the baseline scenario is the continuation of the use of current (baseline) transport systems, provided that it can be demonstrated that the ***existing transport system can meet the demand of passengers in the project scenario.***
 - Demand for passenger: key parameter when designing public transportation projects;
 - Increase in the number of passengers: operation of the system is compromised
- Population growth: natural city development;
 - Baseline transport systems → saturated; and
 - Baseline scenario → no longer valid;
- **Proposed solution:** to revise AM0031

Impacts

- The revision will broaden the applicability of AM0031.

Recommendations to the Board

- The MP recommends the Board to seek a mandate to revise AM0031.

Thank You
